

Morning Milly

We have finally finished our negotiations with all suppliers and are confident we have negotiated the best possible deal after going back and forth with various suppliers, as you know you have been extremely lucky by taking a 5-year contract as that means you missed the peak of the energy crisis last year. The energy crisis is not over and not forecasted to end any time soon however the market is in a far more stable place which is why it is imperative we renew your contracts now.

Now at an initial glance, SSE and Corona might look cheaper, however, they wouldn't work out the most cost-effective as there is an additional 2 years of protection, based on your historical experience, I would ask:

1. Do you think between now and 2026 do you think the energy market will increase by less than £400?
2. Do you think between now and 2028 do you think the energy market will increase by less than £400?

I have managed to secure an off for the Gas for the Council Hall. What this means is from now until 2020 the Council is protected against the forecasted increase and allows you to forward plan your budget for the next 5 years.

As requested, I have included below some information about Engie:

- ENGIE are committed to helping small to medium-sized businesses move to a low-carbon workplace by providing clean, affordable energy solutions as well as lowering energy consumption and making greener choices. We've been active in the UK energy market for over 20 years and are well-equipped to deal with the current market volatility. All our contracts have the option of 100% renewable electricity, which is a cleaner and more sustainable alternative to traditional electricity generation.

- Active in the UK energy market for over 20 years, our Energy Supply ENGIE Headquarters are based in Leeds, West Yorkshire. ENGIE is a global energy player with UK investments in renewable energy and storage, whilst supplying gas and electric energy to organisations of all sizes.
- <https://www.youtube.com/watch?v=1QUcKBQxRRg>
- Amazon, Microsoft and Google are all customers of ENGIE since 2020, In 2021, Orange Netflix, and then Google followed suit.
- 24 million customers around the world

As explained previously we work on a live market, and due to the energy crisis, we are experiencing, it can be volatile currently, which means we can only hold prices on the same day. If you can let me know which contract you want to go ahead with, and I will get it drawn up for you. Any questions please do not hesitate to contact me on my direct details below.

Kind regards

Izzy
