ESTIMATE	
Estimate No.	1421
Date	24/02/2021

Description	Total
Ref: Electrical Supply within Sparrow Park.	
To install a new power outlet within the walled area where the Christmas tree is erected, to prevent the need to run power cables overhead each year, from flagpole to tree.	
The intention is to split the existing supply cable, feeding the outlet at the base of the flag pole, by splitting the cable and installing a cable splitter.	
A metal street furniture cabinet will then be installed into a cement base.	
A power outlet will then be installed within the new cabinet.	
This is the best case scenario, subject to being able to dig down to the existing cable without disturbing any public walkways. If however, once the route of the existing cable has been established and it takes another route, more investigation will have to be carried out, which will also require other outside organizations to become involved; ie Highways and other contractors. This in itself will require additional costs.	
MATERIALS	£447.80
LABOUR	£720.00
TOTAL	£1167.80

Terms and Conditions

Where the Company agrees to provide Services, any estimate or indication by the Company as to the number of man days or man hours required by the Company to undertake a specific task shall be construed as being an estimate only.

The company reserves the right to adjust the final invoice to:

1. Reflect any additional work required to complete the project to required specifications iaw BS 7671 Wiring Regulations 2019

2. Reflect any additional work requested by the customer.
