

TORPOINT TOWN COUNCIL

BUSINESS RISK MANAGEMENT PLAN – JANUARY 2022

Introduction

As an integral part of the current audit regulations for larger councils and in line with best practice is the production of a Business Risk Management Plan to strategically underpin the Council activities which is closely linked to the authorities accounts. The Business Risk Management Plan is the key component of the Council's annual assessment of risk and the Annual Governance Statement signed by this Council confirms that an assessment of risk is also undertaken and that appropriate internal controls have been implemented. The purpose of this plan is to identify financial, strategic and operational risks that could undermine the effective operation of the Council and therefore impinge on financial and legal issues that may have a detrimental effect on the organisation if ignored or not implemented. The Business Risk Management Plan will also compliment the Town Council Development plan, policies and best practice.

The Accounts and Audit Regulations 2015 is the principal document that governs this plan and applies to all relevant authorities as defined in Schedule 2 to the Local Audit and Accountability Act 2014. The plan also includes best practice within the Joint Panel of Accountability and Governance Practitioners' Guide (March 2020). The plan is comprehensive and covers most if not all risks that are likely to be encountered. The plan is a key component of Torpoint Town Council risk management and is included as a standard agenda item of the relevant Committee.

Methodology

Similar methods of risk assessment have been adopted by larger organisations especially charities for some considerable time and is referred to as SORP (Statement of Recommended Practice). The principles are applicable to local Councils and are used by Torpoint Town Council to evaluate the current systems and procedures in place and make recommendations for either review or implementation. In addition to SORP the Local Council's Governance and Accountability Guidance has also been reviewed as a standard of best practice. The systems are also comparable to the Total Quality Management (TQM) Excellence Model that is part of the EFQM (European Foundation of Quality Management). The Business Risk Management Plan and Town Council Strategy forms the core of Council development and strategy.

Strategy

The Town Council Strategy Plan is the strategic document that will underpin current and future Council activities. It will be complimentary to this document as it is reviewed annually in response to issues raised in the Business Risk Management Plan that analyses and questions the key Council operational functions and also the development strategy for the town. Business Risk Management must not be confused with the Town Council Strategy – the Strategy is the document that informs what the Council intends to do and how it is going to get there. The Council therefore needs to set a critical path of how and when the key milestones are to be reached. Each facet of the plan must be reviewed by the appropriate committee, unless a specific date is included within the plan to denote outturn or outcomes. The plan should also be considered in tandem with other policies of the Council and is included as a monthly agenda item by the appropriate and relevant Committee.

QUESTIONS/ISSUES	RISK/OBSERVATIONS	RISK	IMPACT	PLANNED ACTION	BY WHOM
Strategic Issues					
How are the Council's objectives to be translated into a Business Plan for the next three years?	Clear direction, objectives and focus	Yes	Lack of guidelines Poor decisions No direction No confidence in Council	<ul style="list-style-type: none"> Review and agree the Town Council's strategy annually.
