**Subject:** Portable/mobile defib

Hi

At last night's TTP meeting it was agreed that some of the money raised for AEDs in our town should be used for a portable/mobile defib which can be used at town events.

Advice has been sought from local first responders and it was decided that the most suitable device was the one used by our local responders.

<https://defibwarehouse.co.uk/shop/defibrillators/cardiac-science-powerheart-g5-cprd-fully-automatic-aed/>

A carry sleeve will also be required.

The cost of both will be fully covered from the defib fundraising but the TTP would like to ask if the TTC would initially purchase the device as the VAT can then be reclaimed. We would also like to ask if the TTC would add the defib to its asset register and hold the device and distribute as required for town events?

I look forward to hearing from you.

Regards

Jenny Hughes

# Cardiac Science Powerheart G5 CPRD Fully Automatic AED

The powerful capabilities of the Powerheart G5 AED enable rescue professionals and lay responders to administer therapy in a timely and effective manner to give a victim of sudden cardiac arrest the best chance of survival.

## Rugged and reliable, so it's always ready

- Rugged, durable design for protection against rough treatment.
- High ingress protection (IP55) against dust and water for performance in harsh and challenging environments.
- Meets rigorous military standards for shock, vibration and drop testing.
- Rescue Ready® technology self-checks all main AED components (battery, hardware, software, and pads) daily. The AED completes a partial charge of the high-voltage electronics weekly, and a full charge monthly.
- The highly visible Rescue Ready indicator assures responders that they are retrieving a working AED.
- 8-year AED warranty.
- Medical-grade battery with a 4-year full operational guarantee.

## Easy-to-use AED for responders at all levels

- Real-time CPR feedback gives rescuers specific guidance on compression depth and rate as recommended by the 2010 Resuscitation Guidelines.
- Fully-Automatic shock delivery eliminates any hesitation by the user.
- Intuitive, interchangeable pad design simplifies placement.
- RescueCoach™ user-paced prompts guide users through each critical step of a rescue.
- Text prompts provide extra help in noisy and chaotic environments.
- Switch to an alternate language during a rescue with the push of a button to help more potential responders (available in select languages).

## Advanced patient care

- Delivers post-CPR shock in as little as 10 seconds for effective therapy.

- Assesses the patient's therapy needs and delivers customised shock at an appropriate energy level.
- Customisable prompts, protocols and CPR feedback to meet user's needs and preferences.
- Automatically detects pediatric pads and delivers a reduced energy shock.
- Easily update settings if Resuscitation Guidelines change.
- Quickly transfer and review data via USB.

### Comes complete with:

- 1 x Cardiac Science G5 battery.
- 1 x CPRD Electrode Pads
- 1 x User manual
- 1 x Quick start tool kit includes- serial communication cable & quick start guide
