

**Proposal to purchase lighting equipment for the Main Hall, Council Chambers  
Report to Finance and Operations Committee meeting Monday 2<sup>nd</sup> December 2024**

The following equipment is available for purchase for the total sum of **£1,250.00**.

It is being sold by Neston Drama Group in Corsham as they have now disbanded and it is surplus to requirements.

The equipment is as follows:

1 X Eurolight LC2412 DMC Lighting Board in Travel Case. This would replace the board that was stolen from the Council Chambers a few years back.

3 x Zero88 betapak3 dimmer rack 12 channel DMX. The council currently owns two, but has the capability to host four and these are of a more up to date standard than ours. Andy Martin Production Support is of the opinion that these three are worth £1,200 on their own.

18 lights as follows: -

4 X CCT Minuette Fresnel 650w

6 X Selecon Acclaim Fresnel 650w

4 X Strand Quartet 22/40 650w variable beam spot

4 X Strand Prelude 28/40 650w variable beam spot

The council currently owns seven lights and these additions would mean that the hall could be rigged fully to give coverage to the stage and hall on a permanent basis, to be switched on as and when required for various events.

Andy Martin [Production Support] is willing to collect the equipment, service and undertake the PAT testing, plus installation, as well as provide basic training to the staff on how to use it, all free of charge.

Installation of this equipment would mean that effective lighting would potentially be available to all hirers, not only those who have received Andy's support for their event.

I know that further development of the hall's infrastructure was a desire of the council a few years back and this opportunity to fulfil that, is too good to miss.

Let me know if you require any further information.

Councillor Mrs Julie Martin  
Chair of Finance and Operations Committee
