**Subject:** Bellevue Square Parking permits

Good Morning.

I was wondering if its possible, or how I would go about petitioning the town council to make the parking in Bellevue square and Barossa road residents parking only with the use of residents parking permits.

The problem is that we have a great many dock yard workers parking outside our properties before getting the ferry as pedestrians to work in the morning and not returning until the afternoon taking parking spaces away from the residents for the entire day.

I would like to point out that the Devonport area of Plymouth has the exact same problem and is currently having a consultation regarding the issuing of residents parking permits to address the problem.

There is currently limited parking for residents, and with the addition of additional vehicles using the area as a free car park for the entire day while they go to work, I feel residents only parking permits would alleviate this issue.

I would also add that with the new proposals for the area, under the "Vision for Torpoint", we will be losing parking spaces in Bellevue Square to plant trees, so parking will become a premium and more difficult for residents.

Any advice as to whether this is possible of how I would go about this would be greatly appreciated.

I look forward to your response

Thanks

Tony Knox-Johnston
