Subject: re updated Tamar Crossings website to provide real time journey information w

Good afternoon

Please see below a copy of the press release about the updating of the Tamar Crossings website to provide real time journey information on multiple routes to both crossings which will be added to the Tamar Crossings website and sent to the media later today.

Tamar Crossings website updated to provide real time journey information for users of Tamar Bridge and Torpoint Ferry.

18 June 2025

Tamar Crossings has updated its website to be more user friendly and provide real time journey information for people using the two crossings.

As well as providing general information about the day-to-day operation of the crossings, the refreshed site, which has been launched this week, will provide real time information on multiple individual routes that rely on the Tamar Bridge and Torpoint Ferry.

The journey time information will be updated every three minutes.

“We are very pleased to be launching our updated website “ said Interim General Manager Andrew Vallance. “We recognise the importance of providing up to date information on journey times to people using the crossings and have worked with our partners to design a programme which provides real time information on routes covering both Cornwall and Plymouth.

“We hope that this will provide a valuable tool to help people plan their journeys to key places such as the city centre and Derriford hospital prior to setting off”.

The updated website, which can be accessed at <https://www.tamarcrossings.org.uk/> has been designed to be compatible with mobiles and tablets.

Kind regards
Trisha
