Information Classification: CONTROLLED

Dear Mrs Jones,

Thank you for your email.

I am pleased to confirm that the water butt installation at Horson Cemetery was completed on Friday 24th July. There is approximately 1,000 litres of water available on site for visitors to use.

Thank you for your patience while arrangements were made to provide this interim water supply. I hope this will assist those visiting and tending graves while longer-term investigations into the permanent water supply continue.

Kind regards,

Emma Wallwork | Environment Officer (Information)
